SHOEB ANTULE

JUNIOR FULL STACK DEVELOPER

Thane, Maharashtra | +91 8779030806 | shoebantule@gmail.com
linkedin.com/in/shoeb-antule | github.com/shoebantule | shoebantule-portfolio.vercel.app

PROFESSIONAL SUMMARY

Full Stack Developer with internship and freelance experience building responsive web applications and REST APIs using React, Node.js, Django, and PostgreSQL. Built authentication, database-driven workflows, and cloud-deployed client projects, with experience working across both frontend and backend development.

TECHNICAL SKILLS

Programming: JavaScript (ES6+), Python, SQL, HTML5, CSS3
Frontend: React.js, Next.js, Tailwind CSS, responsive web applications, component development, REST API integration
Backend: Node.js, Express.js, Django, Django REST Framework, FastAPI, RESTful APIs, JWT authentication, RBAC
Data / Web3: PostgreSQL, MongoDB, SQLite, Solana, @solana/web3.js, wallet validation, token-claim workflows
Cloud / Tools: AWS, Azure, Vercel, Netlify, GitHub Actions, CI/CD, Git, Postman, WordPress, technical SEO, unit testing
Professional: Client communication, cross-functional collaboration, problem solving, project ownership, debugging

PROFESSIONAL EXPERIENCE

Full Stack Developer Intern | Asthatic Social | Jan 2025 - Mar 2025

- Delivered the IBI Group cybersecurity web application with React, Tailwind CSS, Node.js, and Express.js; configured Vercel CI/CD and completed launch with 0 reported defects.
- Engineered responsive service pages plus a backend-validated contact and lead-capture workflow, covering frontend implementation, REST API integration, testing, and deployment.

Frontend Developer Intern | AradhyaTech | Jan 2024 - Feb 2024

- Completed a responsive HTML5, CSS3, and JavaScript client landing page within a 2-week sprint; optimized assets and improved page load time by approximately 30%.

SELECTED PROJECTS

Blockchain Wallet Checker and Token Claim Platform | Freelance Client Project

- Developed React and Node.js workflows that queried 3.3M+ Solana wallet records for eligibility and displayed token allocations through a responsive interface.
- Implemented Base58 validation, multi-criteria eligibility logic, claim processing, admin claim-history tracking, responsive status states, and @solana/web3.js integration.

Automated Leukemia Detection System | National Hackathon Project

- Created an AI-assisted blood-smear classification platform in a 12-hour hackathon using Python, Django REST Framework, PyTorch, a CNN-GRU model, and Grad-CAM heatmaps.
- Secured doctor and patient workflows with JWT, RBAC, input validation, report uploads, patient-doctor linking, verification, and API error handling.

Restaurant Website and Order API | Freelance Client Project

- Launched 5 core website experiences with a Node.js order API and applied semantic structure, metadata and image optimization, responsive design, and technical SEO practices.

Online Quiz Management System | Academic Project

- Built a 3-role Django and SQLite platform with JWT, RBAC, user-management controls, audit features, and Azure OpenAI GPT-4o question generation.

EDUCATION

B.E. Computer Engineering: Rizvi College of Engineering | 2022 - 2026 | CGPA: 7.95/10
H.S.C. (Science): A. E. Kalsekar College | 2020 - 2022 | 71.69%
S.S.C.: St. John Convent High School | 2009 - 2019 | 77.94%

CERTIFICATIONS

- AWS Academy Graduate - Cloud Foundations (Apr 2025)
- Complete WordPress Website Developer Course, Udemy (Aug 2026)
- Postman Student Expert (Nov 2024)
- TATA Virtual Experience, Forage (Dec 2023)
- DevTown Full Stack Bootcamp (Mar 2023)

LEADERSHIP AND ACHIEVEMENTS

- Technical Head, Code Cell
- Smart India Hackathon 2024 Representative
- 2nd Prize, Debugging Competition (2023)
- 2nd Prize, The Tech Chase Quiz Competition (2025)
